

HIGH PERFORMANCE TYRE

# ATREZZO ELITE

## PERFORMANCE RATINGS:

Wet Performance: 9

Dry Performance: 9

Ride Comfort: 8

Quietness: 8

Tread Life: 8

Four wide main grooves and tread sipe design effectively drain water to improve wet grip.

Asymmetric tread design - inner tread elements help provide efficient drainage, and the outer tread elements offer exceptional handling to obtain optimal driving performance.

A strip within the outer groove not only makes the outer block more robust, but also improves the handling performance. The design adds a special and attractive look to the tyre.

Simple staggered layer groove design makes the pattern more dynamic.
